

RESEARCH VOLUNTEERS NEEDED

Researchers in the Department of Psychiatry in the **Program in Genetics & Epidemiology of Neuropsychiatric Symptoms (PGENeS)** are conducting a study to understand the causes of obsessive compulsive, chronic tic, and related disorders (for example, Tourette syndrome, hoarding disorder, skin picking and hair pulling disorder).

We are looking for volunteers to participate in a study on behavior and genetics. This study involves questionnaires, an interview about your health and behavior history and a blood draw.

WE ARE LOOKING FOR VOLUNTEERS WHO:

- **Are adults or children over the age of 4**
 - **Have one of the disorders listed above**
- OR**
- **The relative of someone with one of these disorders**
- AND**
- **NO history of dementia, encephalitis, meningitis or severe head injury**

Total time for the study is expected to be between 3-4 hours. Participants will be compensated for their time.

If interested please email or call the PGENeS Research Team at

PGENES@hsc.ufl.edu or 352-294-5564.
